Project Name: Retail Customer Retention Analytics

Objective: Design and develop an interactive Power BI dashboard to analyze customer journey, purchase patterns, and retention trends, utilizing data modeling, DAX, and dynamic visuals to generate actionable insights for strategic decision-making.

One of the Brands You Will Work On: **Starbucks, Netflix, Adidas, Tesco, Walmart, Target**

Note: The brand you will work on, along with the datasets and a detailed problem statement, will be shared with you by the team at the beginning of child course 3.
